Welcome back to another round of issue #39 of my Marveling at the Mercurial Marvel miniseries. Tagged 'The Pretty Deadly,' we get a special episode starting with a mid-issue recap of the last issue to set up readers for what comes next. This was such a pleasure to write because I get to spend some time with one of the industry's most fascinating and influential franchises, and, more importantly, a cast of characters that I've been excited to get to know for a long time now. Hopefully, the conversations I had with the editors of the series and with the series' creators are something new and exciting for readers. CGC 2.0 - the new standard for Marvel comics - is in! This issue, readers will get to see a few of their favorite comics for a brand-new cost (2.0). Now, let's talk. If you've been part of any discussion about CGC lately, you know that the system has changed and there is a new benchmark for comics grading and certification. CGC 2.0 is the new standard for grading over the counter in the US; that is, those who don't want to pay CGC's much higher fees will now have to invest more time in the grading to earn a paper certificate at a lower cost. And, if you want to get a taste of what a higher grade looks like, CGC 2.0 comic books will be rolling out in waves, with many of the comics we saw in the second series of issues available for pre-sale. I'm very excited about this news, and I am actually disappointed I couldn't publish these new issues with full CGC 2.0 grading (I had to make a last-minute switch to stock 2.0 to make sure the books would be ordered). During this past episode, we didn't spend much time discussing the new grading

ProShow Producer is Microsoft's slide show, video, and audio authoring software. The product can create and edit slide and video presentations, audio-only presentations, and document. Besides creating and editing presentations, ProShow Producer can also be used as a Web browser for viewing. The new DVD and Blu-ray disc formats became the standard for audio and video recorders in the home as they were able to store more data than the magnetic tape cassette. They were however larger and heavier than the VHS cassette, and thus a series of VHS recorders (VCRs) were developed, enabling the home movie set to store up to 500 hours of video on a single cassette. Digital time-lapse cameras perform the task automatically, however, if you set a timer on your camera this feature can be turned on manually at the time of shooting. long exposure photography, commonly also known as time-lapse photography, is a method of photography in which a camera is configured to take a single, long exposure of the scene, and then review the image later. Long-exposure photography is useful for capturing motion over extended periods of time. Long-exposure photography may allow the photographer to capture otherwise difficult-to-capture phenomena including clouds moving across the sky, ocean waves, rivers, or traffic moving along a road. Among the first cameras to offer such a feature were the Polaroid Zink Guides. This format was popular in the 1970s through the 1990s, and is still in use in the 21st century. The state of the art, at the time the Nikon SLR was released, was the Nikon F3, the first digital single-lens-reflex camera. Over the last few years there has been a 3da54e8ca3
