Its predecessor, AutoCAD LT (short for Autodesk AutoCAD Light Tool), first appeared in 1998. The computer system needed to run AutoCAD is very complex. To run AutoCAD, a Microsoft Windows-based system is required. AutoCAD requires a video card with a minimum resolution of 800x600 pixels. Also, in its current form AutoCAD is only compatible with Microsoft Windows 7, Windows 8, Windows 10, and Windows Server 2012, and later. AutoCAD and AutoCAD LT have built-in connectivity to the Internet and email, and they can import and export files using the native file format, which is Autodesk DWG (Adobe DXF). AutoCAD LT for Linux is an open source AutoCAD product developed by the Chinese company, SinoPak Technology. It was the first CAD application for the Linux operating system to have direct sales through the major Linux distributors, including Red Hat Linux, Debian GNU/Linux and Ubuntu Linux. AutoDesk has also released two other open-source programs: Accelerator and AutoCADK. AutoDesk Accelerator is a lightweight Java 3D 2D content creation framework that enables users to quickly create interactive 2D/3D content. AutoCADK is a free open source plug-in for AutoCAD that brings over 100 additional tools and functions to AutoCAD. Because AutoCAD's code is written in ObjectARX, it is easily ported to other languages. For example, Visual LISP is a programming language that enables the creation of AutoCAD macros in MacLisp. In Visual LISP, macros are functions that can be used to automate the drawing of objects, as well as other tasks. Besides, the AutoCAD source code is also used by other open-source tools, such as Open Architectural CAD (OACAD), OpenCAM, ArchiCAD and NetCAD (a.k.a. CadRo) System requirements In order to run AutoCAD, system requirements include: PC: Microsoft Windows XP or later.
