Q: Black screen when touching power button on Samsung Galaxy S2 edge I'm currently working with my Galaxy S2 edge and I've noticed that every time I touch the power button, the screen turns black and I can't do anything else but force-shutdown. I didn't do any modification on my system prior to this (apart from installing a third-party app that fixed a problem with some camera app, but I don't think this one has any relevance). How can I fix this? A: Not an exact answer, but it really depends on what you are trying to do. For example, if you're trying to get access to the phone's contacts or make a call, you'll need to hard-shutdown the phone to get into those menus.
